

TYPICAL SWALE SECTION

NOTES:

1. The "n" denotes an extended footing where "n" equals the extended footing depth.
2. Deviation from this criteria will require prior approval of the City.
3. Callout all elevations as shown.
4. This handout primarily applies to single family residential development. Finish floor elevation shall be a minimum of 1 foot above the 100 year storm, whichever is greater.
5. Sidewalk drains shall not be used in residential construction.
